How To Calculate an Address

- Write down the **NUMBER** of your address.
- If you live at **4978 Broad St**, write down:

4978

How To Calculate an Address

- Add all the numbers and bring the total down to a single digit “root” number:

$$4+9+7+8 = 28$$

$$28 = 2+8 = 10$$

$$10 = 1+0 = 1$$

- The address number for this property is 1.

How To Calculate an Address

- If you live in an apartment/condo, calculate the number of **your unit**. The unit number is your personal address number. For 4978 Broad St, #107

$$1+0+7 = 8$$

- For addresses with Letters, you must add the numeric value for the letter as well:

1	2	3	4	5	6	7	8	9
A	B	C	D	E	F	G	H	I
J	K	L	M	N	O	P	Q	R
S	T	U	V	W	X	Y	Z	

How To Calculate an Address

- An address of **33 Main St, #5B** would be added:

$$5+B = 5+2 = 7$$

- Whenever a number AND Letter are present, you want to look at both the Number as a standalone vibration, and the number & letter total.
- In this case, both the numbers **5** and **7** are activated.

How To Calculate an Address

- An address of **1139 Ivy Blvd** would be added:

$$1+1+3+9 = 14$$

$$14 = 1+4 = 5$$

The address number for this property is **5**.

How To Calculate an Address

- An address of **1139 Ivy Blvd, #69** would be added:

$$6+9 = 15$$

$$15 = 1+5 = 6$$
